

TECHNICAL DATA SHEET

AZAR EMULSION PAINT

INTRODUCTION

Azar Emulsion Paint is a Vinyl water based paint that can be used on interior and exterior masonry surfaces with a fine resistant and durable finish.

APPLICATION

Azar Emulsion Paint is recommended for a wide range of applications including masonry and wood.

Before applying Azartex, the surface should be cleaned properly to remove dust, loose particles primer and fatty materials. The application of a suitable primer is also crucial before applying the paint.

After priming, AZARTEX should be diluted up to 20% water and applied onto the surface by needed means of a brush or roller. Two to three coats will be depending on the surface.

COMPOSITION

AZARTEX is a Vinyl Matt Emulsion, water soluble paint that contains fillers and extenders.

PROPERTIES

ANALYSIS

Appearance:	Wide variety of colours
Ph:	11 – 13
Solid Content:	65 – 67 %
Density:	1.46g/L
Coverage / per Coat:	±12 M ² /Ltr. (according to porosity of Surface)
Dilution:	Up to 20% with Water
Drying Time:	30 Minutes

STORAGE & PACKAGING

AZARTEX should be stored at a temperature below 40°C.

AZARTEX is available in 4.5ltr, 11.25ltr and 20ltr containers
